THE POLICIES OF THE FAMILY HOPE PROGRAMME(PKH)

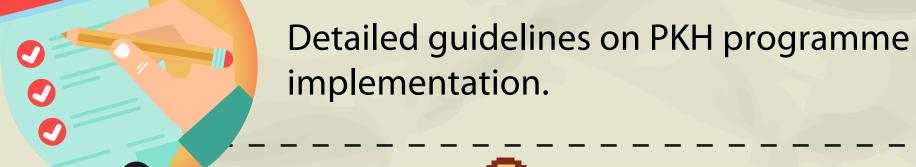

The Family Hope Programme (PKH) is a programme that provides financial assistance to very poor families on condition that they participate in local health and education services. The programme aims to improve the quality of human resources and to change behaviour in accessing health and education services. It is hoped that the programme can break the cycle of poverty.

 Promoted coordination with the Ministry of Education and Culture, the Ministry of Religion and the Ministry of Manpower and Transmigration.

 Facilitated the Ministry of Social Affairs in establishing cooperation with Bank Rakyat Indonesia to distribute PKH assistance to participants registered in 2012.

 Worked with Bank Indonesia to develop and perform pilot tests on the distribution of PKH assistance through the use of electronic money.

PKH TRANSFORMATION

 Facilitated the Ministry of Social Affairs in handing over data on students from PKH participant households to the Ministry of Education and Culture and the Ministry of Religion to ensure that PKH participants recieve BSM benefits.

Created PKH transformation strategies.

AND THE MINISTRY OF

SOCIAL AFFAIRS

Implemented recertification (data recollection) of PHK participants in Cohort 2007 and 2008, to observe socio-economic conditions as well as participation requirements among PKH households.

ON PKH **EXPANSION** ENCOURAGE **IMPROVEMENTS** IN THE AMOUNT OF

ASSISTANCE

- Encouraged improvements to PKH beneficiary targeting by using the Unified Database, from the results of 2011 PPLS.
- Previous PKH targeting was household-based, but has since become family-based.

 Advocated an increase in the maximum level of assistance to Rp 1.8 million per participant in 2013, from Rp. 1.4 million per participant.
